

Subject: Daisy-Chain Power Connectors	Initial Release Date: 03/01/99	Revision Date: 04/20/00	
	Product Group: BB-Series Bargraph		

This document applies to the following models:

- BB101P/BB202P
- BA101P/BA202P
- SA101P/SA202P

Some versions of the BB101P feature two power connectors on each Input Board. This allows multiple bargraphs to be powered from one source by daisy-chaining the power connectors together. The illustration below shows the locations of the power connectors and how they can be connected. Please refer to Figure 3 of the Bargraph Installation and User Guide (072-40253) for wiring diagrams of the Signal connector.

Alternate Wiring for Dual Power Input Models:
